NextStepElectric

NextStep Electric introduces the next step in pole climbing!

Made especially for Utilities.

NextStep Electric makes pole access easy!

It's as simple as pulling a wagon.

1 - Wheel cart to pole

2 - Setup cart & lift

Setup only takes a few minutes. The NextStep Electric Custom Pole Climber is made specifically for utilities, all parts are treated to ensure they are non-conductive.

Once it's set, secure your pole.

3 - Secure lift to pole

4 - Power the lift with your drill

When you get to the desired height you are ready to get to work! Any where you need to be the NextStep Electric Custom Pole Climber makes getting up the pole safer, easier and more effective than traditional pole climbing methods.

For delivery or more information about the NextStep Electric Custom Pole Climber please contact our sales team and take the NextStep in Pole Climbing.

5 - Cart at working height
